Plowing soil prior to next harvest

5 July 2012

A photograph of a long, arched greenhouse. Two men are standing in the center; one is operating a red walk-behind tillage machine on a patch of brown soil. The greenhouse is filled with various plants. On the right, there are tall, dense green plants, possibly cucumbers, supported by a trellis system. On the left, there are smaller plants, including some with yellow flowers. A white cylindrical object hangs from the ceiling on the right. The overall scene depicts a busy agricultural setting.

Plants at the edge of the greenhouse (dill, basil, chamomile, peppermint, etc.) used to prevent the spread of diseases

5 July 2012

A photograph showing three people working inside a long, arched greenhouse. The ground is covered with a layer of dark plastic sheeting, which is being laid out over a raised garden bed. A man in a white t-shirt and dark shorts stands in the center, holding a shovel. To his left, another man in a dark t-shirt and light-colored shorts stands with his back to the camera. To the right, a woman in a striped shirt and dark pants is crouching, working on the plastic. In the background, another person is visible, also working. The greenhouse structure is made of metal frames and translucent plastic. The ground is sandy and uneven. The text "Laying out plastic sheets prior to planting cucumbers to absorb warmth and prevent growth of weed" is overlaid at the bottom of the image.

26 July 2012

Manually weeding unwanted plants and grasses

A photograph showing three men in a greenhouse, manually weeding rows of plants. The men are wearing blue shirts and dark trousers. They are bent over, pulling weeds from the soil. The greenhouse has a metal frame and a translucent plastic covering. The plants are arranged in long, straight rows, and the soil is dark brown. The background shows more of the greenhouse structure and some outdoor vegetation.

Manual weeding and plowing

22 August 2012

A group of people are working in a long, covered walk-in cold frame or greenhouse. They are bent over, planting seeds into rows of tilled soil. The structure has a metal frame and a translucent covering. The ground is covered with white plastic mulch between the planting rows. The scene is outdoors, with a grassy field and trees visible in the background.

Green beans

8 September 2012

A photograph of a long, arched greenhouse. The structure is made of metal frames covered with translucent plastic. Inside, there are multiple rows of green bean plants growing in a dirt path. The plants are lush green and appear to be in the early stages of growth. The perspective is from the end of the greenhouse, looking down the length of the structure. The lighting is bright, suggesting it's daytime.
